transcriptional regulators. *FEMS Microbiol. Rev.* **27**, 145–163 (2003).
sensitive and rapid measurements of arsenite and arsenate in potable

Quorum sensing is a cell to cell response system. It was utilized in our project as an amplification for the metal input. This would theoretically yield a quicker response time.

Implementation

Two sets of promoters for tetracycline and lactose and arabinose. According to literature, that is not activated until
