

Summarized notebook

Goal, work and results

Work and Goals

4 topics:

- Human Practices
- Sponsors
- Meetings
- Kappa scripts

1. Human Practices:

The work of Human Practice was The Synthetic Conquest of Mexico, for this I worked with Luis Fernando Montaña(Advisor) and Daniela García (Team Member) to establish basic ideas about the Conquest. I was focused in planning lecture to high school students.

After that, I gave 3 lectures in two different institutions

- LUX: 14th October. León, Guanajuato. Mexico
- Universidad de La Salle Bajío JAT. 15th October. León, Guanajuato. Mexico

I also worked capturing all information of surveys.

2. Sponsors:

We were worry about our participation in Jamboree because of economic possibilities were limited. I sought for new sponsors and I processed the problems about money.

3. Meetings:

When we were having our first meeting we needed to have a notebook about. So, for this part I wrote special data in Logbook. After specialization of members in specific work, I just wrote general meetings and some modeling meetings.

4. Kappa scripts:

After specialization, I worked in green receptor as well as blue and green emitter scripts.

Results

1. Human Practices:

The lectures were successful in two institutions.

- LUX
 - Class 1. Bio-Chemistry area: 45min. 28 students.
 - Class 2. Bio-Chemistry area: 90min. 24 students.
- Universidad de La Salle Bajío JAT.
 - Bio-Chemistry and Math-Physics area: 45min. 180 students.

Students in lectures answered surveys 1 and 2.

2. Sponsors.

Our participation is confirmed and complete team will assist.

We achieved donations by two corporations: Biosis and Grupo Columbia.

3. Meetings

Information about [Meetings](#) is in OpenWetWare and [Wiki](#).

4. Kappa scripts.

Kappa scripts are available in [OWW](#).

Other stuff

1. When we were discerning about bioparts which help us, I find a probable green receptor, we will report this biopart but we are expecting it works. Biopart was obtained by information of this [paper](#). After that I found another [article](#) that forces our expectation.
